INFINITY8

Natural Alabaster

The "Infinity 8" chandelier is composed of eight quarter circles, showing the infinite symbol in volume. The "Infinity 8" is suspended by three thin leather threads, inviting your gaze to be lost in endless contemplation.

INFINITY ILLUSION

Inspired by the Möbius strip, "INFINITY ILLUSION" seduces with its improvised and poetic form. "INFINITY ILLUSION" draws its strength from its protean appearance and its asymmetrical design. Depending on the angle from which one contemplates this luminaire, a new random configuration appears subject to all interpretations, a true optical illusion. On the eye, a multitude of sculptural works are created, all different from each other, ad infinitum. Without top or bottom, "INFINITY ILLUSION" moves in space in a very fluid rhythm totally weightless.

LIBERTY

LIBERTY embodies a new poetic variation of the INFINITY spirit. These suspensions open another dialogue between space and light. Aerial, they come in three models with different shapes and constructions: LIBERTY A, LIBERTY D and LIBERTY N. Each LIBERTY can be tilted and adjusted in height to adapt to the room.

The suspension, held by simple leather-wrapped steel cables, seems to levitate. A ring in chrome-plated, shiny or satin-finish gold or bronze brass emphasizes its minimalist structure. The strength and simplicity of the geometry gives them the possibility of adding up, complementing each other, multiplying with harmony. The three modules with their tubular structure, unique or associated in compositions, recall the Loft spirit or that of industrial architecture and can be integrated into any type of universe.

marble integrates the years into the patterns of uncut jade. We sculpt this beauty in the form of minimalism. uncut jade series represents our design concept, returning to essence and simplicity from complexity. We have retained the "true" part, texture, texture and traces of the passage of years of marble, and we have intuitively analyzed this beauty in a very simple form to complete the design transformation from primitive to jade.
